Client Name:
City of Lincoln

Date Completed:
April 2017

Location:
Lincoln, Nebraska

General Contractor:
Sampson Construction

Architect

Size:
49,000 SF

Woods Park Tennis Center was a 49,000 ft² pre-engineered metal building project. Ironhide was brought on as a consultant for this project during the design phase. When we were invited on we were given a hand in the design and functionality of the building. The tennis center replaced two 30 year inflatable domes that enclosed the tennis courts. The new facility was developed using CHIEF Buildings® pre-engineered metal. This was the second indoor tennis facility we provided and erected with Sampson Construction.
