Papillion Field House Pemb

Papillion Field House is a 53,000 SF indoor athletic facility in Papillion, Nebraska. Ironhide Construction provided and erected the pre-engineered metal building (PEMB). To minimize obstructions for the athletes the building is a 200' wide clear span by 265' long with a single slope roof that is 35' high on the low side and 50' high on the high side. There is also a viewing mezzanine that is suspended from the roof structure, eliminating the need for columns.
