CLOCK TOWER ANIMAL CLINIC

Ironhide Construction teamed up with Clock Tower Animal Clinic and Architectural Design Associates to transform an existing building into a modern and highly functional space. We started by completely reworking the exterior of the building with new ADA access ramps, Hardi Siding, glass store-front, and a new roof. Then we stripped the interior of the facility until only the exterior walls remained. With the help of many high quality and experienced subcontractors the interior of the facility took shape with all new electrical, hvac, plumbing, framing, drywall, flooring, cabinets, paint, and fixtures. Our experience with all parties involved was an absolute pleasure and the project was a success. The vet clinic is now fully operational and ready for new clients.
