Client:

Victory Lane

Date Completed:

May 31, 2020

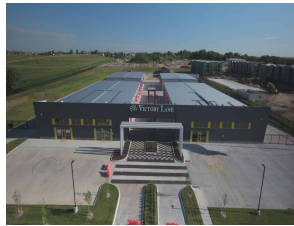

Location:

Omaha, Nebraska

Architect:

Avant Architects

Size:

Victory Lane

Ironhide Construction supplied and erected the 4 buildings on this one-of-a-kind project. It is Omaha's only private car condo complex. This new concept will also feature a private community and private clubhouse for the purpose of Car Clubs, Charitable Events, Sponsored Club Events, and Car Shows. The design versatility of PEMB and the attention to detail that you expect from Ironhide Construction are on full display in this project. The buildings featured a vertical corrugated metal panel and a horizontal, concealed fastener metal panel. The front walls of 2 of the buildings have a sloped wall with an interlocking architectural flat panel. All of these features combine to create an eye-appealing building that stands out in a crowd.
