ANYTIME FITNESS GC TENANT

Ironhide Construction Inc teamed up with Design Associates of Lincoln and Anytime Fitness to convert an existing restaurant into a new exercise facility. During the 75 day schedule we were able to completely renovate the existing space into the beautiful space you see above. This project was made possible by our partnering with exceptional subcontractors that understood the expected schedule from the beginning. Though the schedule was tight we successfully completed the project on schedule and on budget in time for the opening of the new location.
