QP ACE HARDWARE

QP Ace Hardware here in Lincoln, NE is a 16,000 square foot Pre-Engineered Metal Building with a 3,000 square foot mezzanine. Along with the storefront, this building will have offices on the main floor and the second floor. The challenge throughout this project is using the insulated panels both vertically and horizontally to give it a modern look. This store plans to open at the beginning of the year 2020, with all the insulated panels, glass storefront, and brick this building will be hard to miss driving down the road. We are pleased to be working with Tru Built Construction throughout this project.
