Granite City

Date Completed:

February 2017

Location:

Lincoln, NE

General Contractor:

Panterra Construction

Architect

Lingle Design Group, Inc.

Size:

GRANITE CITY LINCOLN, NE

Ironhide Construction provided and installed architectural metal panels and trim on the facade of this new Granite City restaurant in Lincoln, Nebraska. This challenging and complex project required over 5,000 SF of specialty trim to be fabricated and installed. Very little information was available in advance regarding the details of the trim pieces. Ironhide had to design and fabricate nearly all of the trim ourselves based on the site measurements. Due to changes between the owner and general contractor, Ironhide reordered materials three times to meet the new specifications.
